

### Step 1: Sign in to IBM Bluemix.

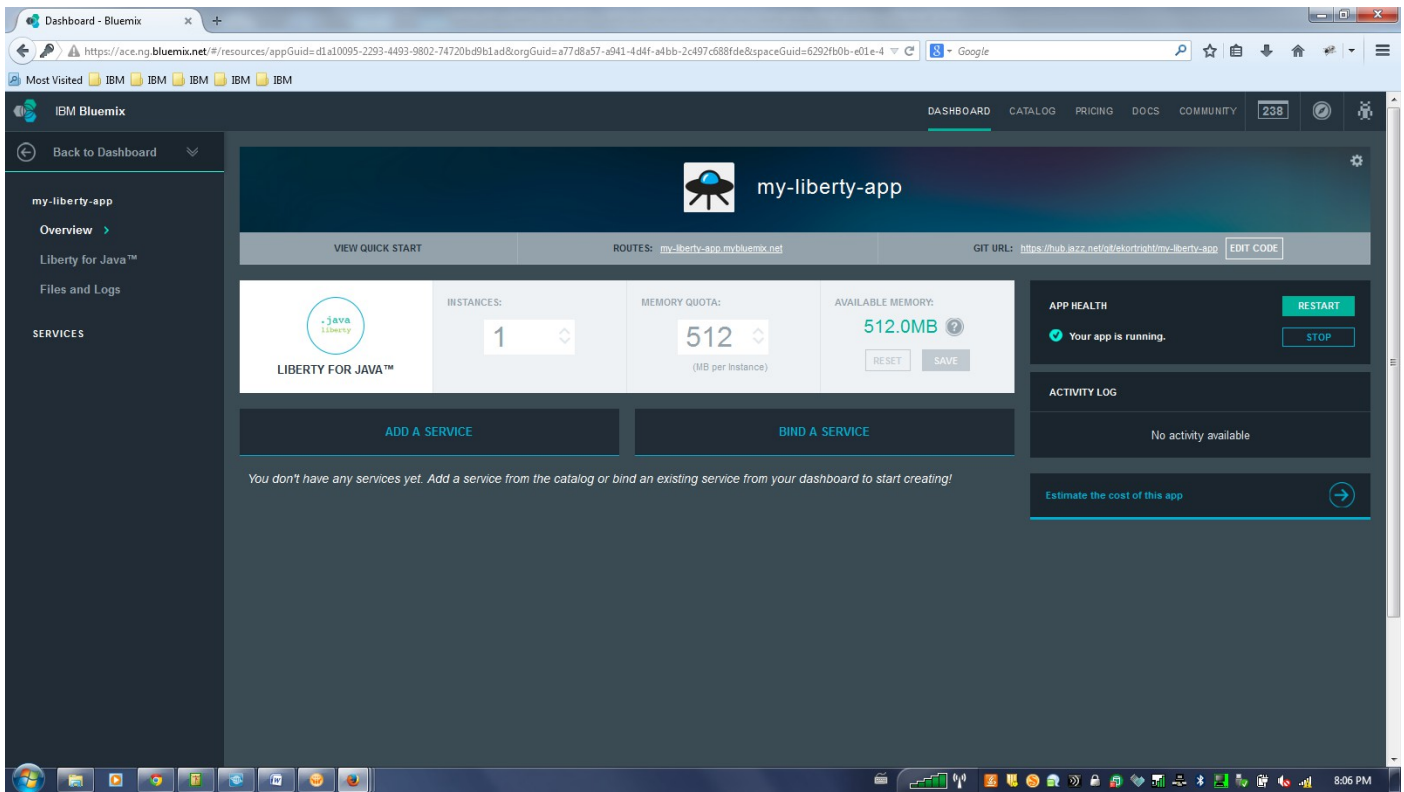

1. Go to <https://ibm.biz/bluemix4kids> and log in using your IBM id.

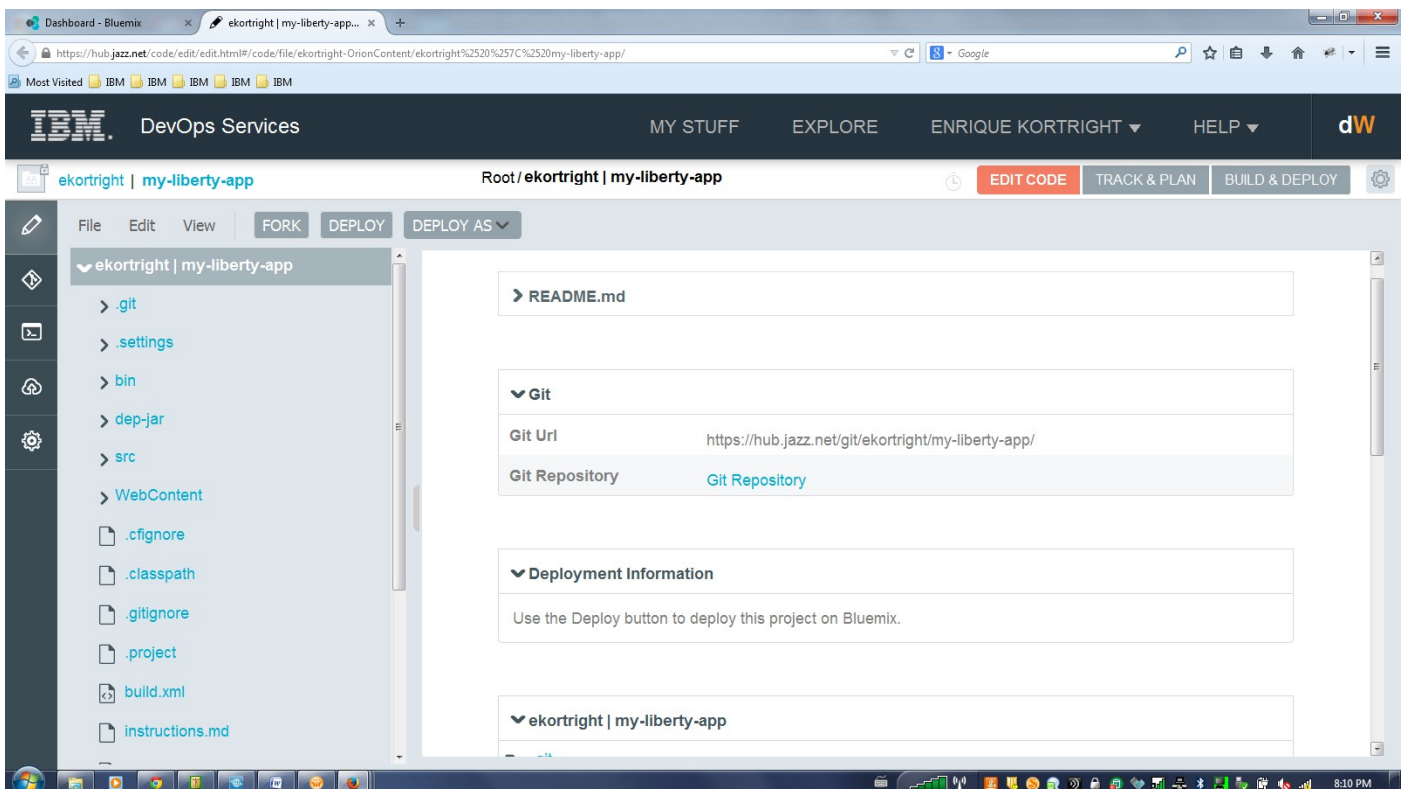

2. Make sure you see your Liberty web app in the Applications section of the screen.

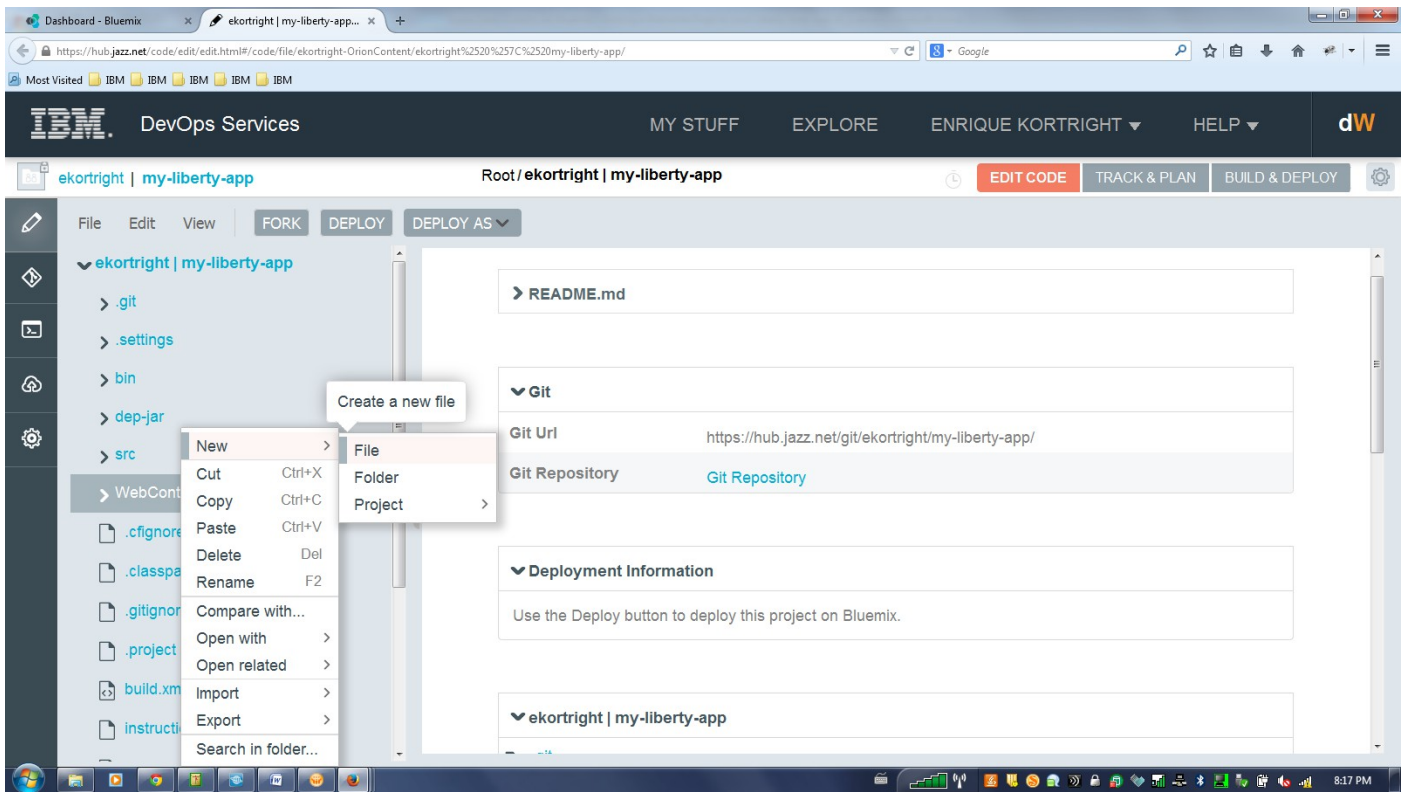

3. Click on the app to open it in the Bluemix UI.

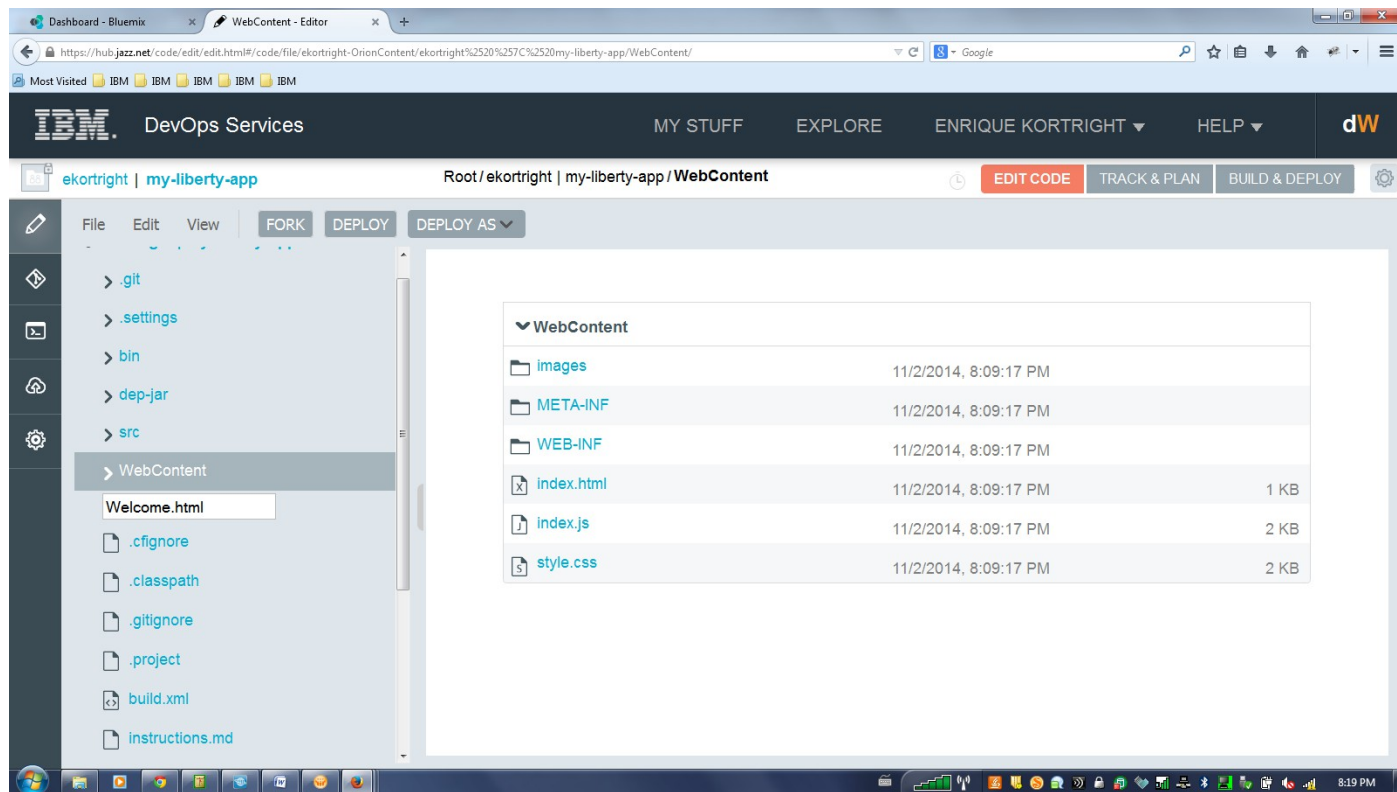

- Click on EDIT CODE to go to your DevOps project. A new tab will open on your web browser and you will be placed in the DevOps Services UI in EDIT CODE mode:

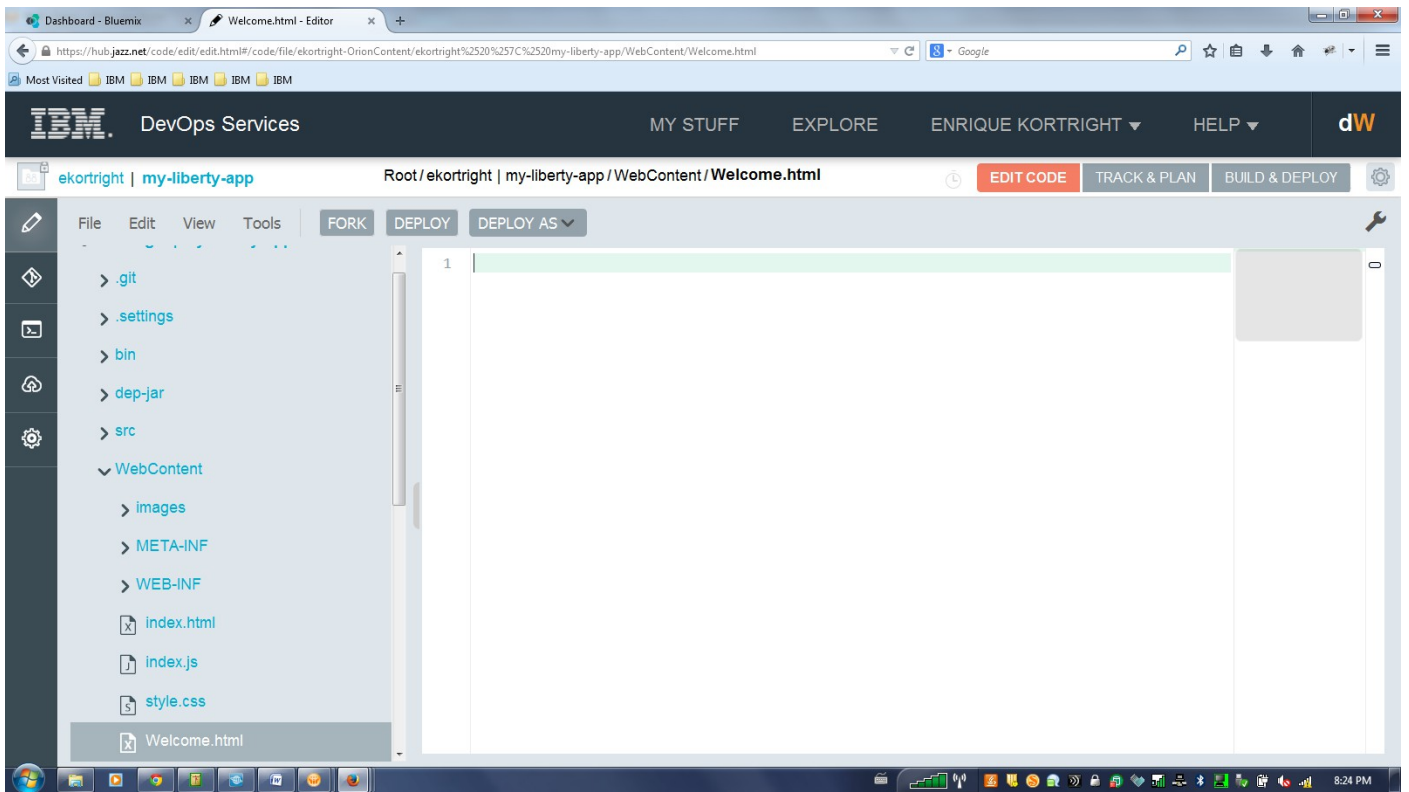

- In the left-hand side menu, right-click on WebContent and select New > File:

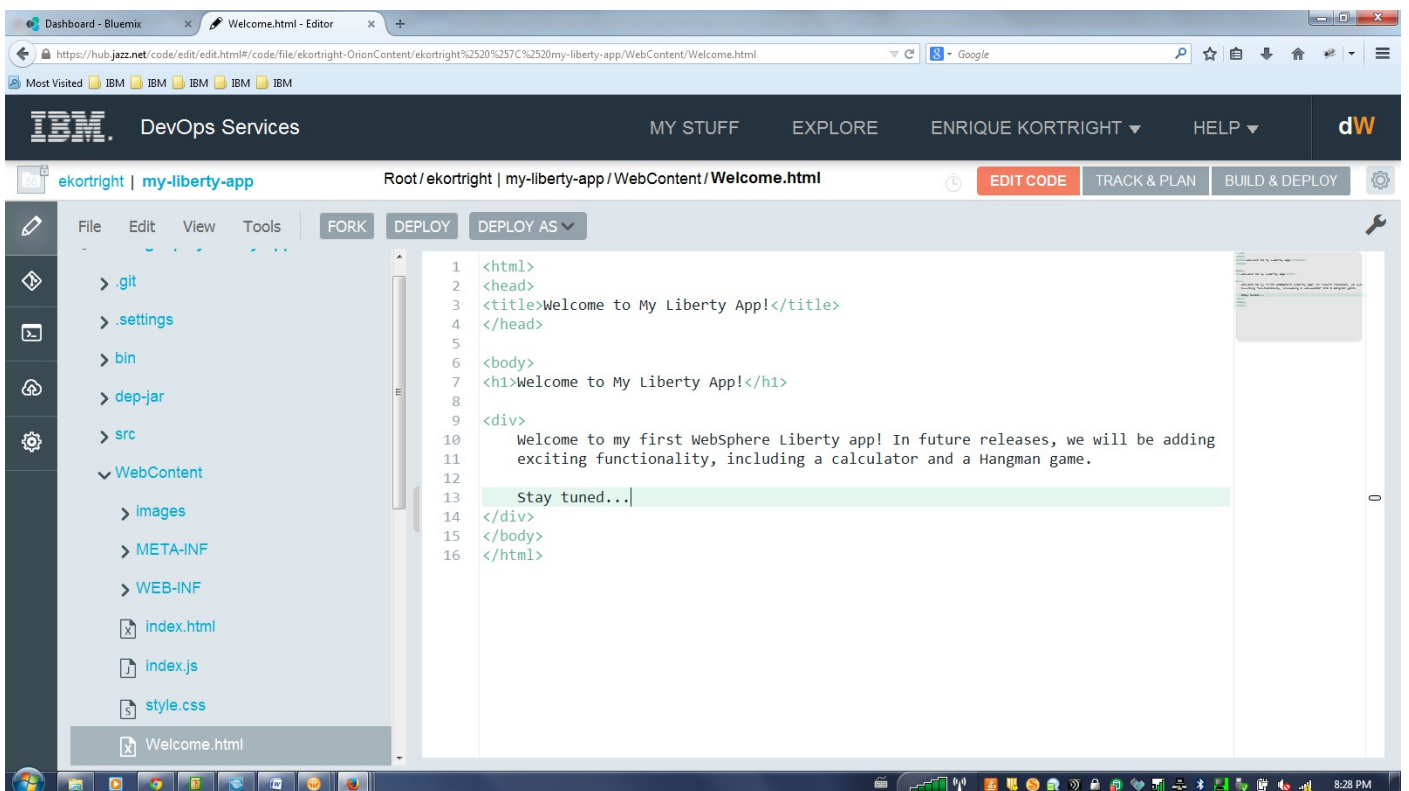

6. Name the file Welcome.html:

7. An editor will open:

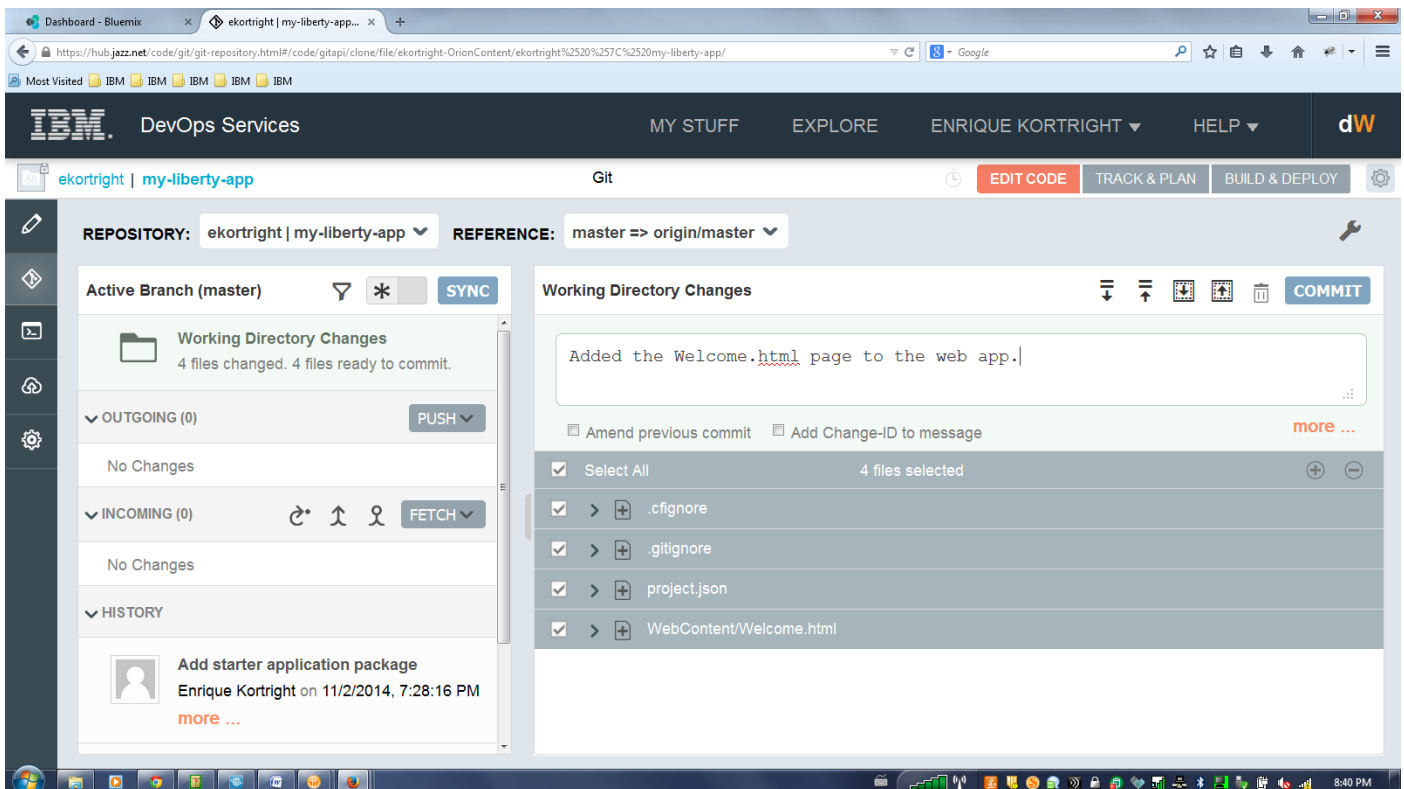

8. Type in the following HTML code to complete your Welcome page:

9. Switch to the Git repository view so you can commit the changes:

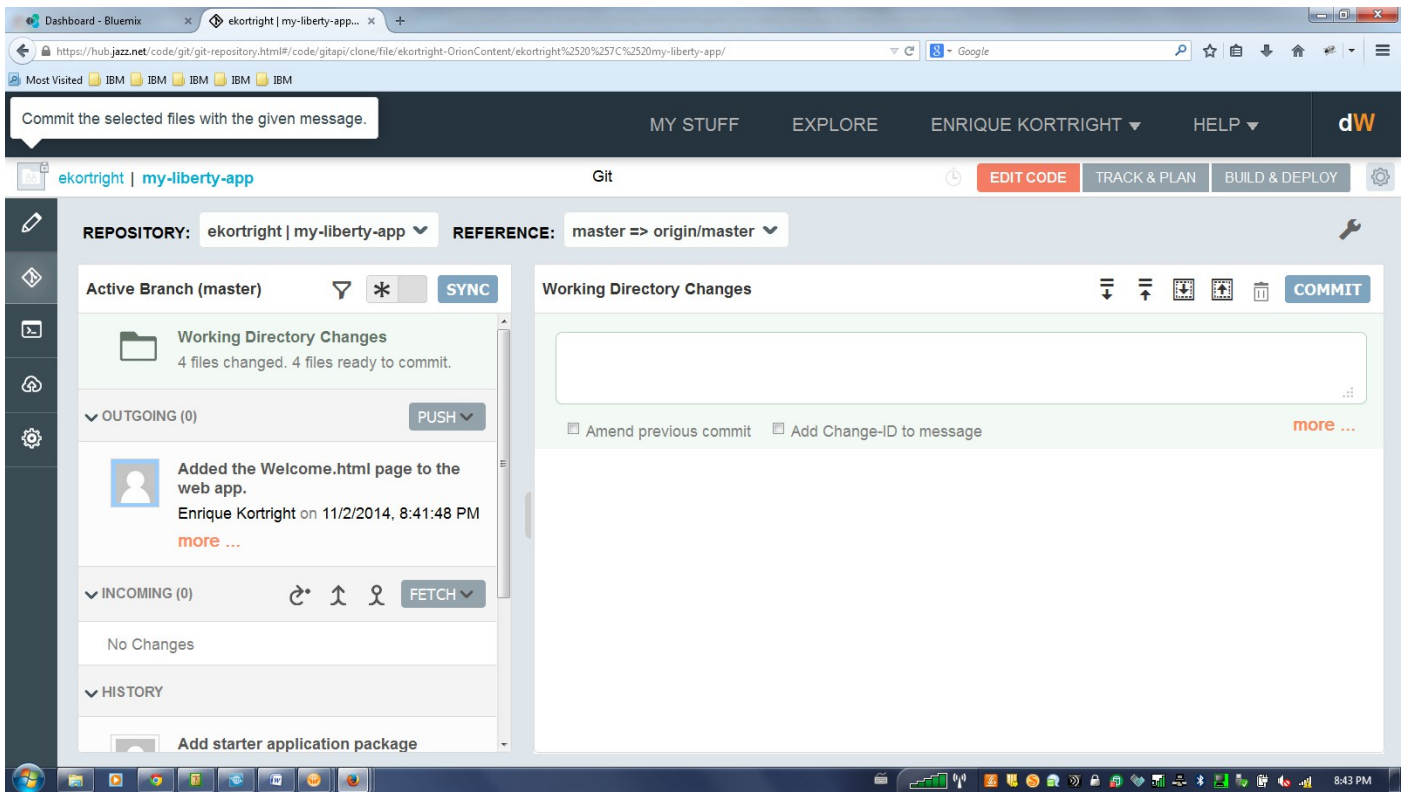

10. Select all the files, enter a message to describe the changes made to the project, and click on COMMIT

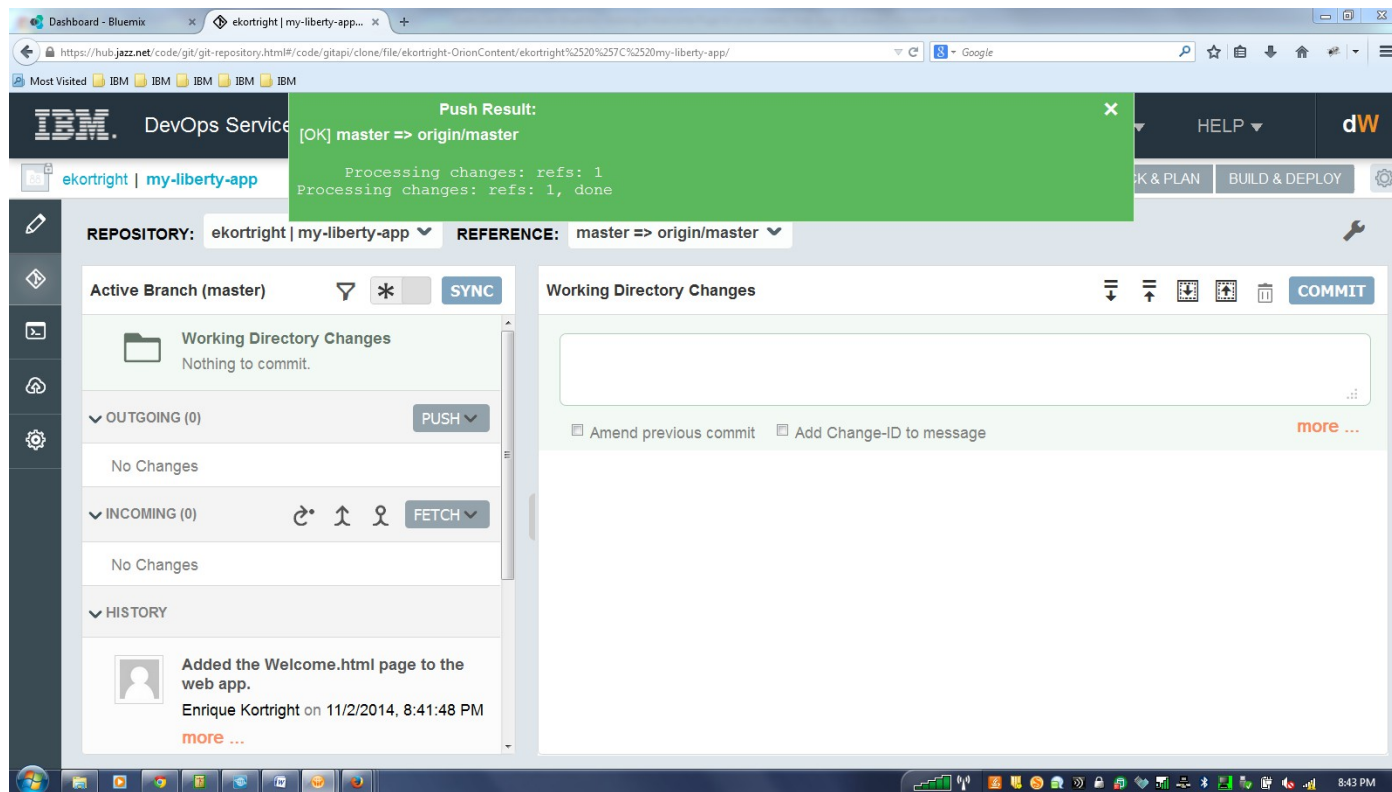

11. Click PUSH to push the changes to the repository:

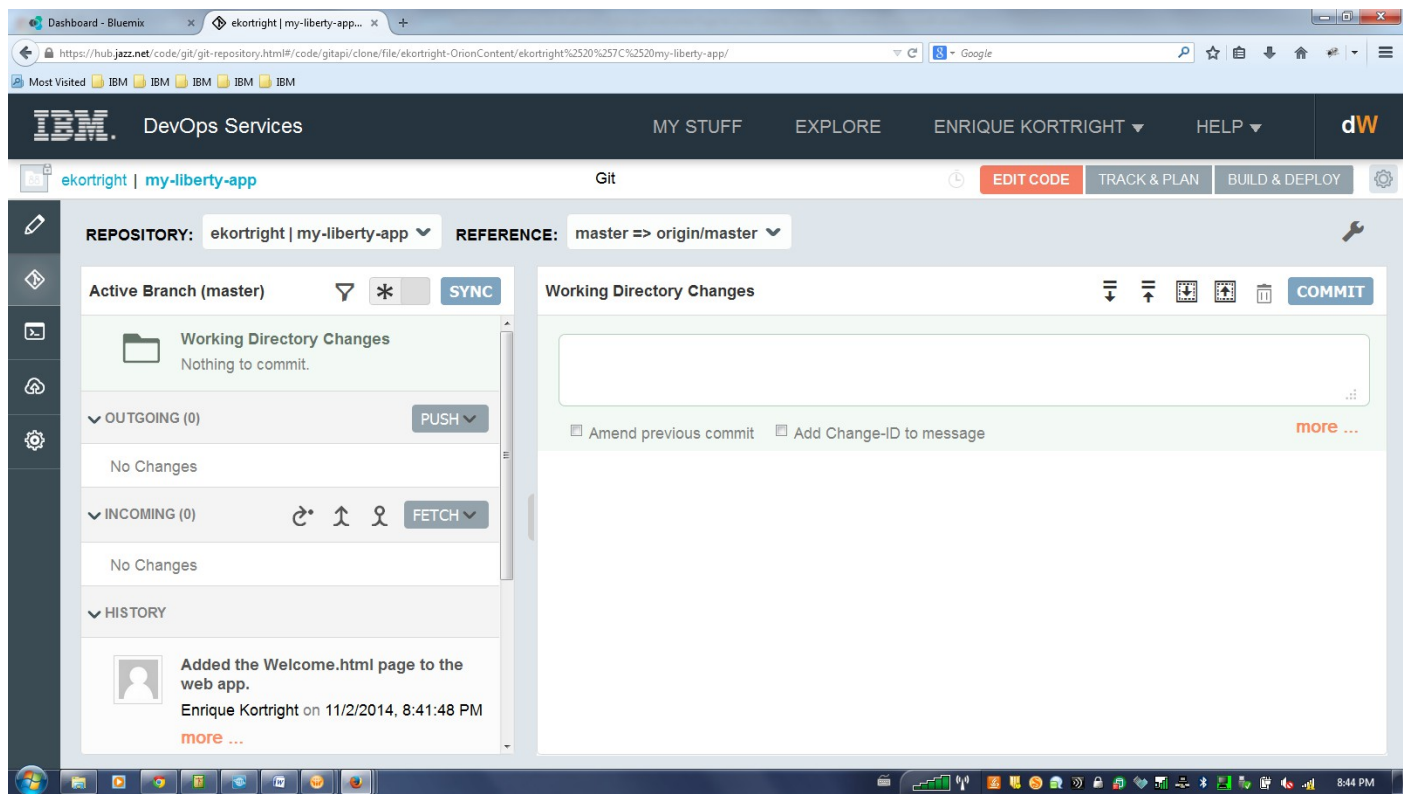

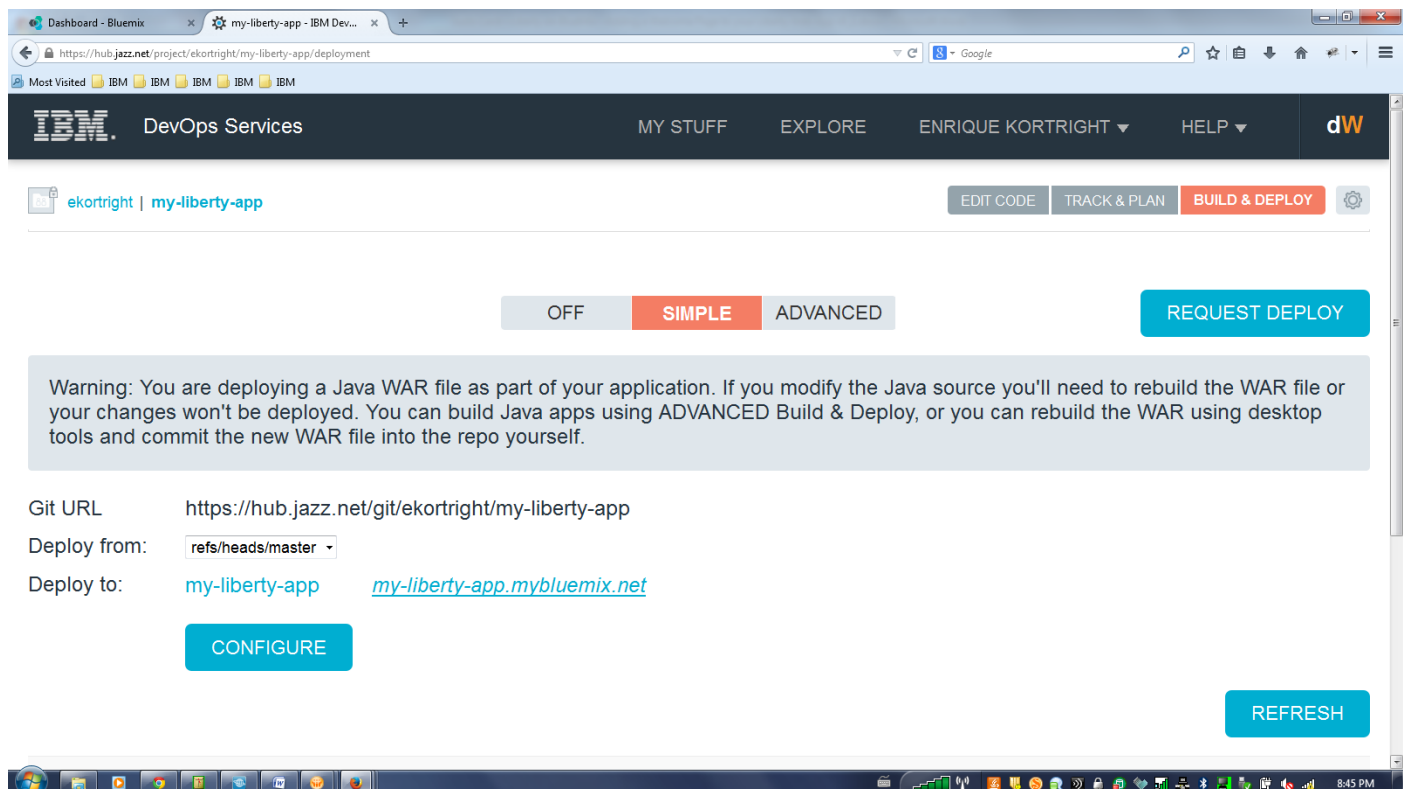

12. Close the confirmation message:

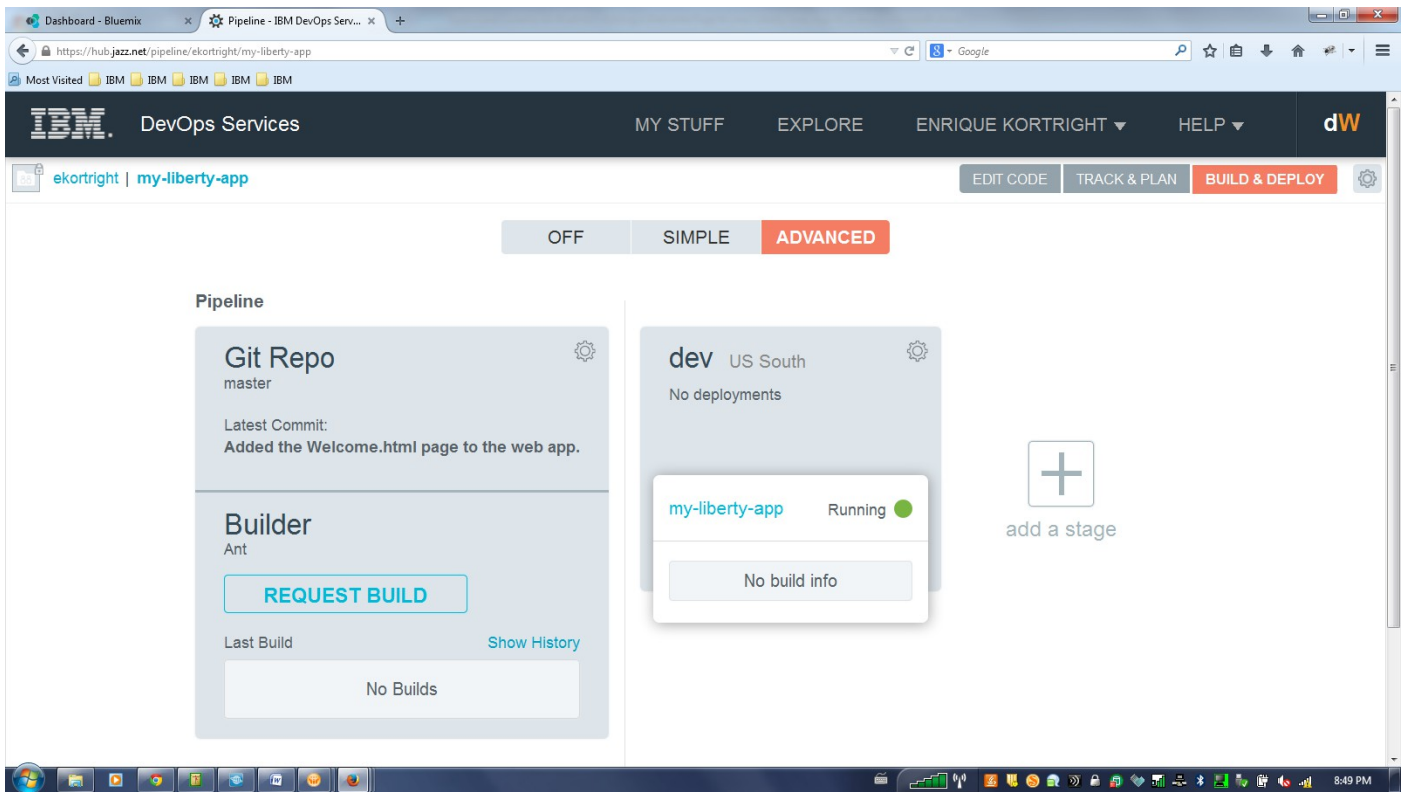

13. Click BUILD & DEPLOY to rebuild and redeploy the app:

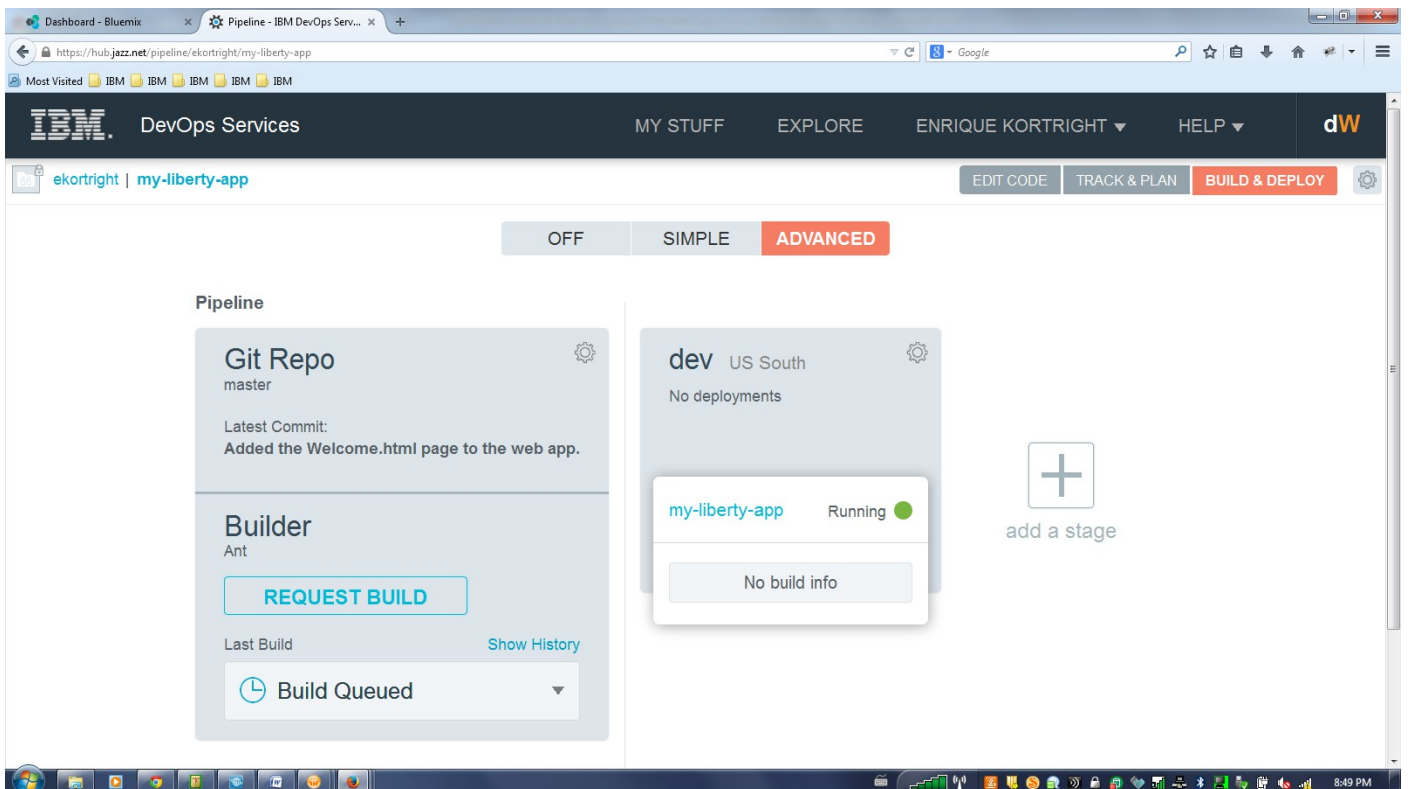

14. Note that your web application is deployed to the Liberty server as a Java WAR file. Click on **ADVANCED** to enter advanced build and deploy mode:

15. Click on **REQUEST BUILD** to start the build and deploy process:

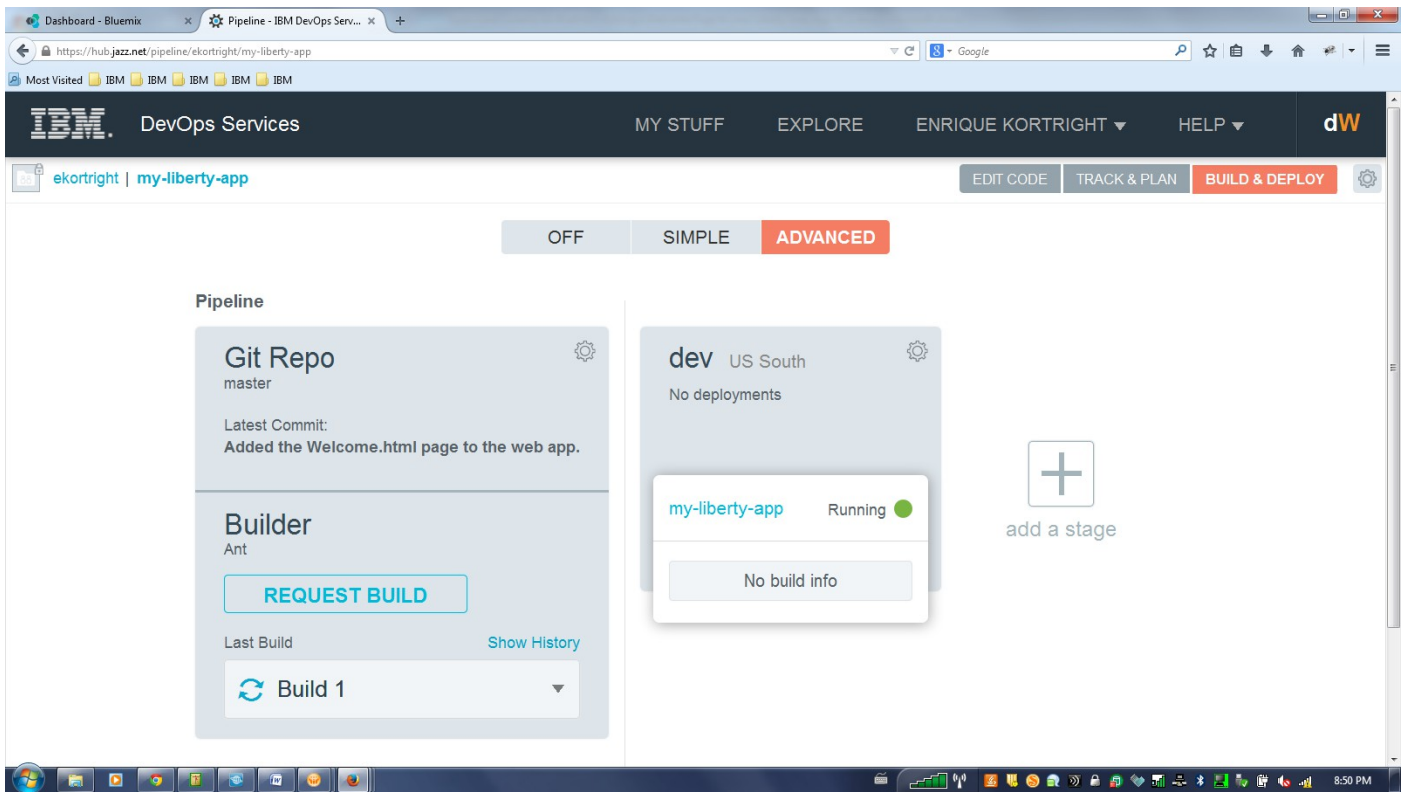

16. The build process is queued:

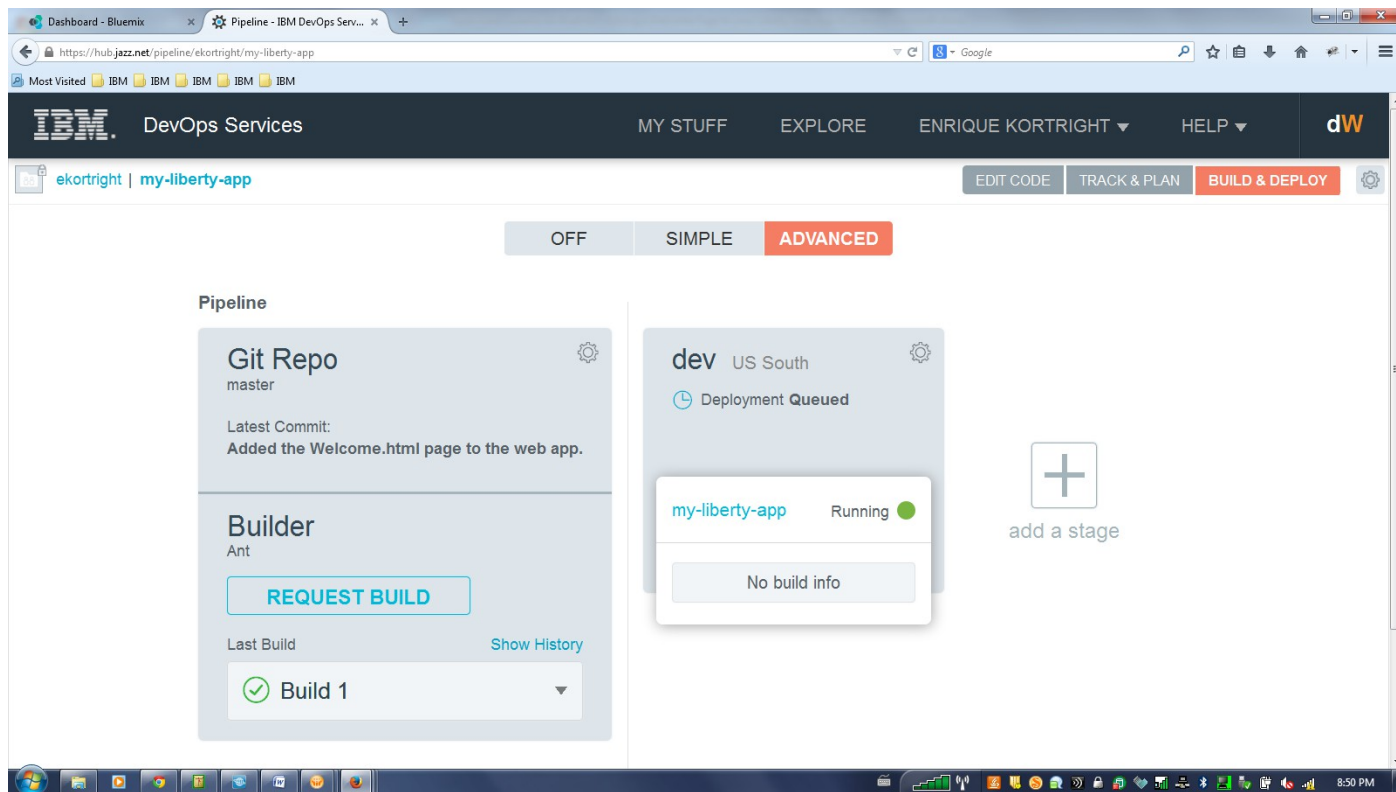

17. After a few moments, the build process starts:

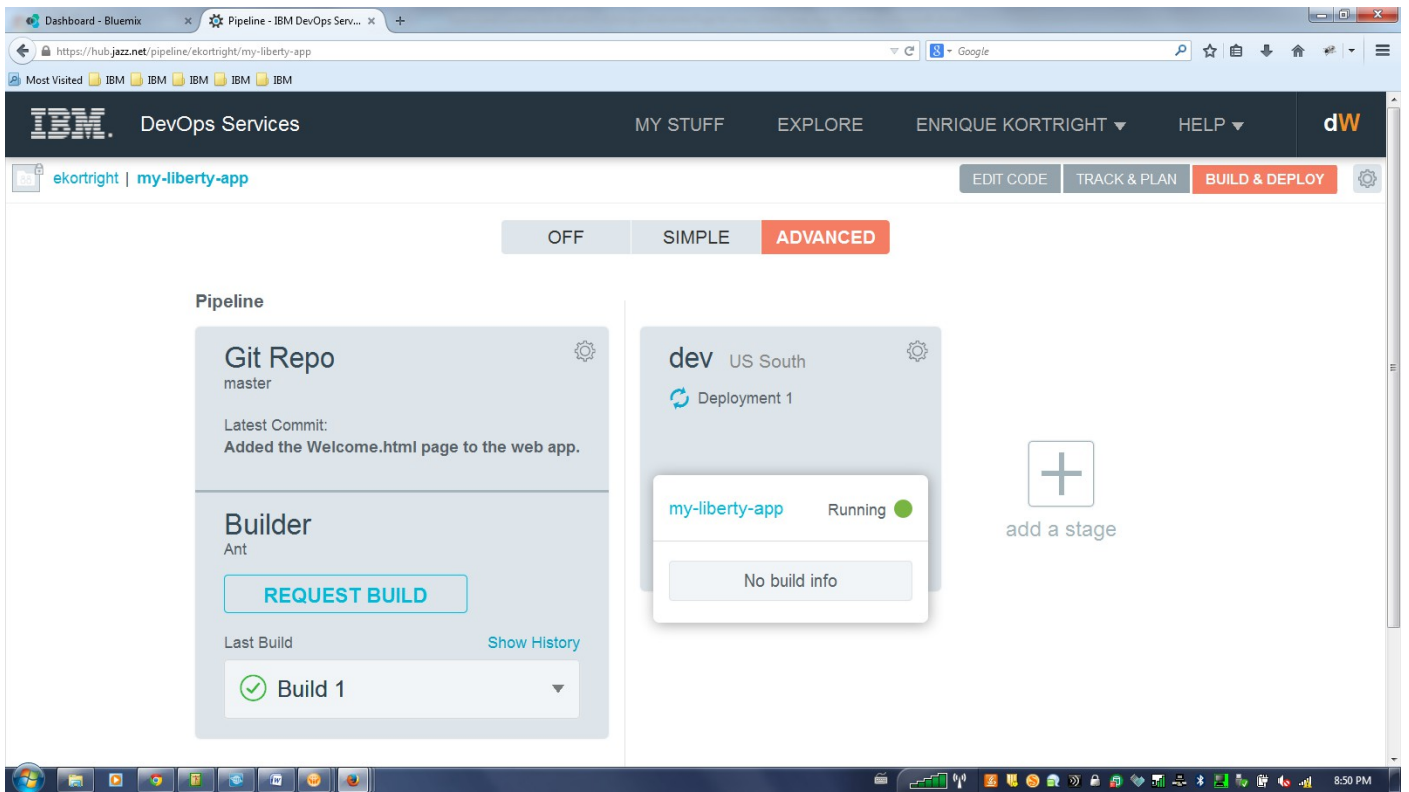

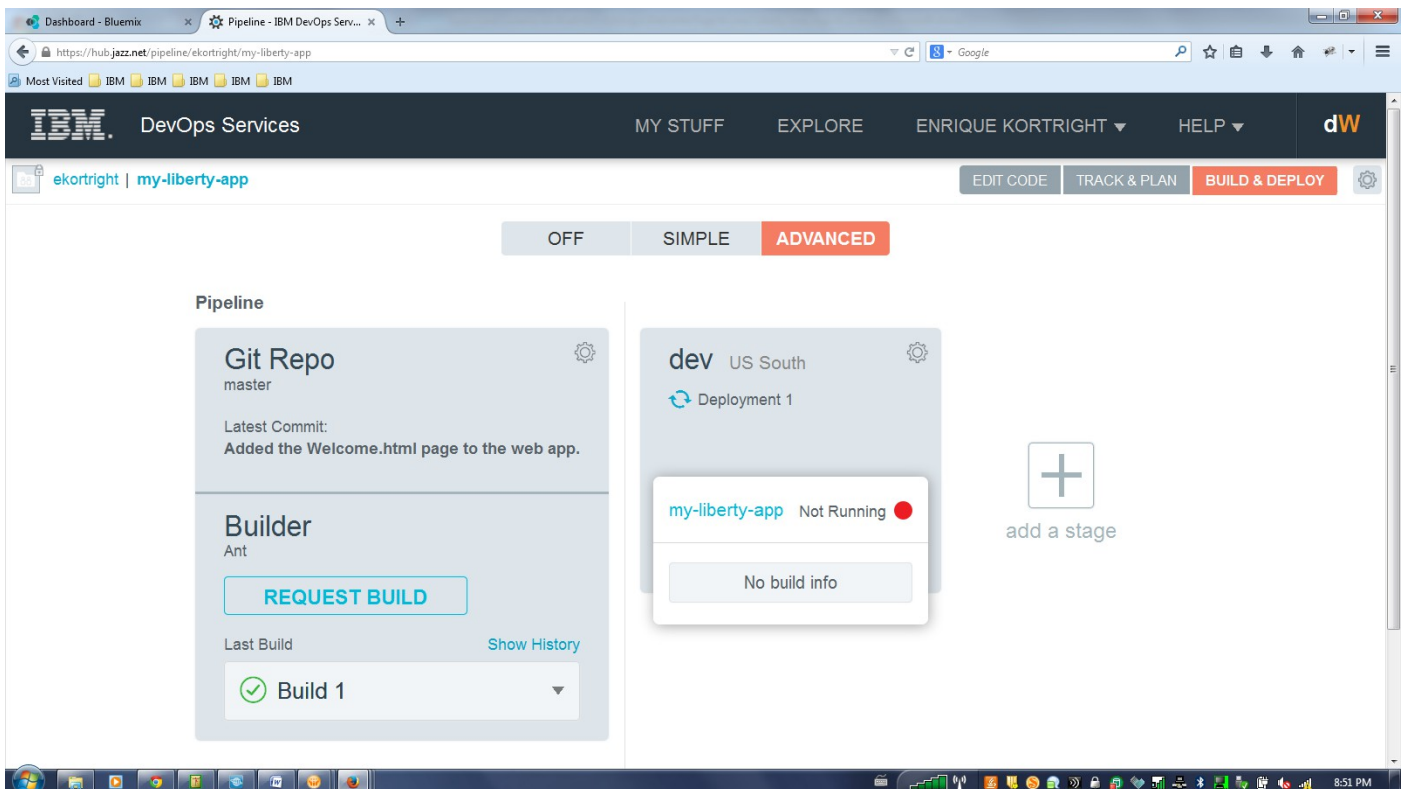

18. The build process completes and the deployment is queued:

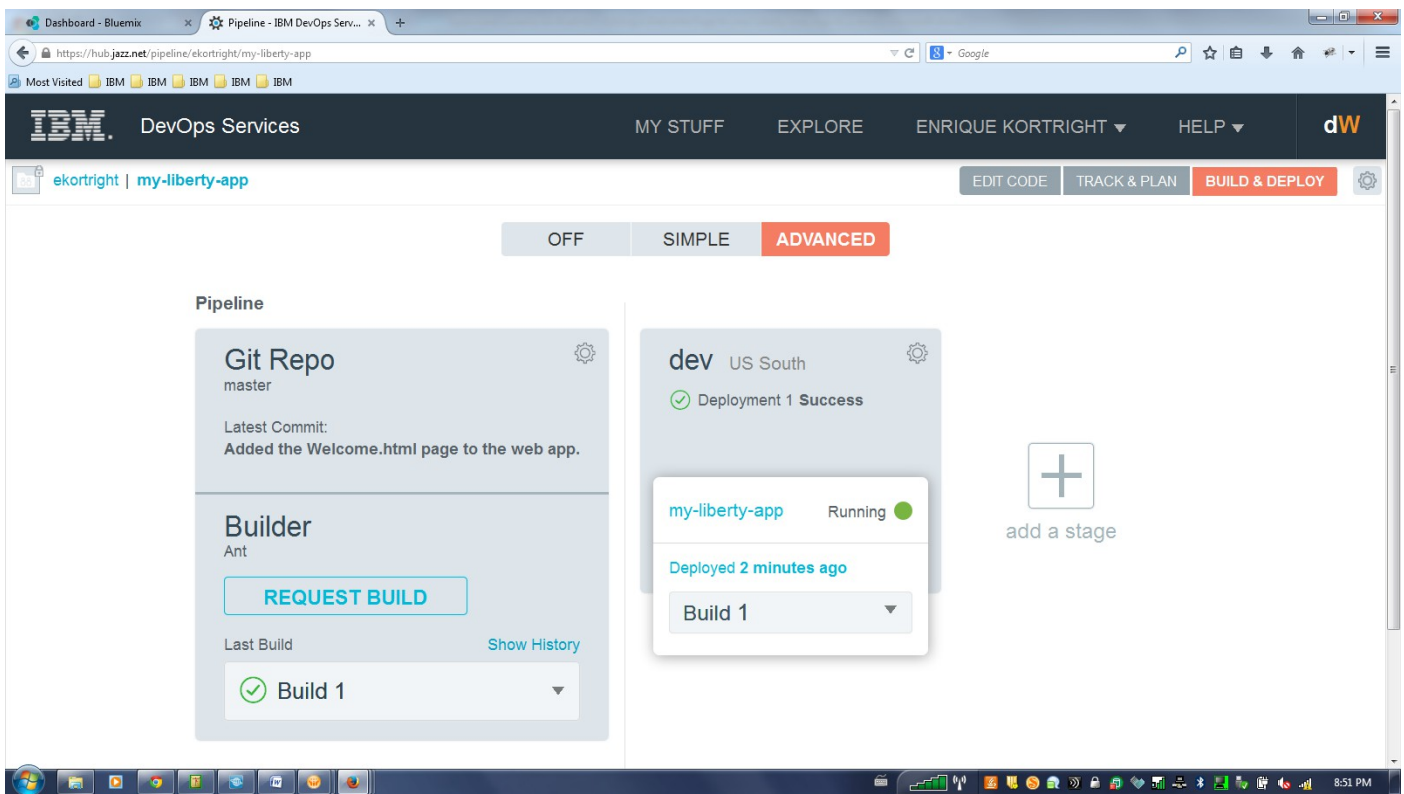

19. After a few moments, the deployment starts:

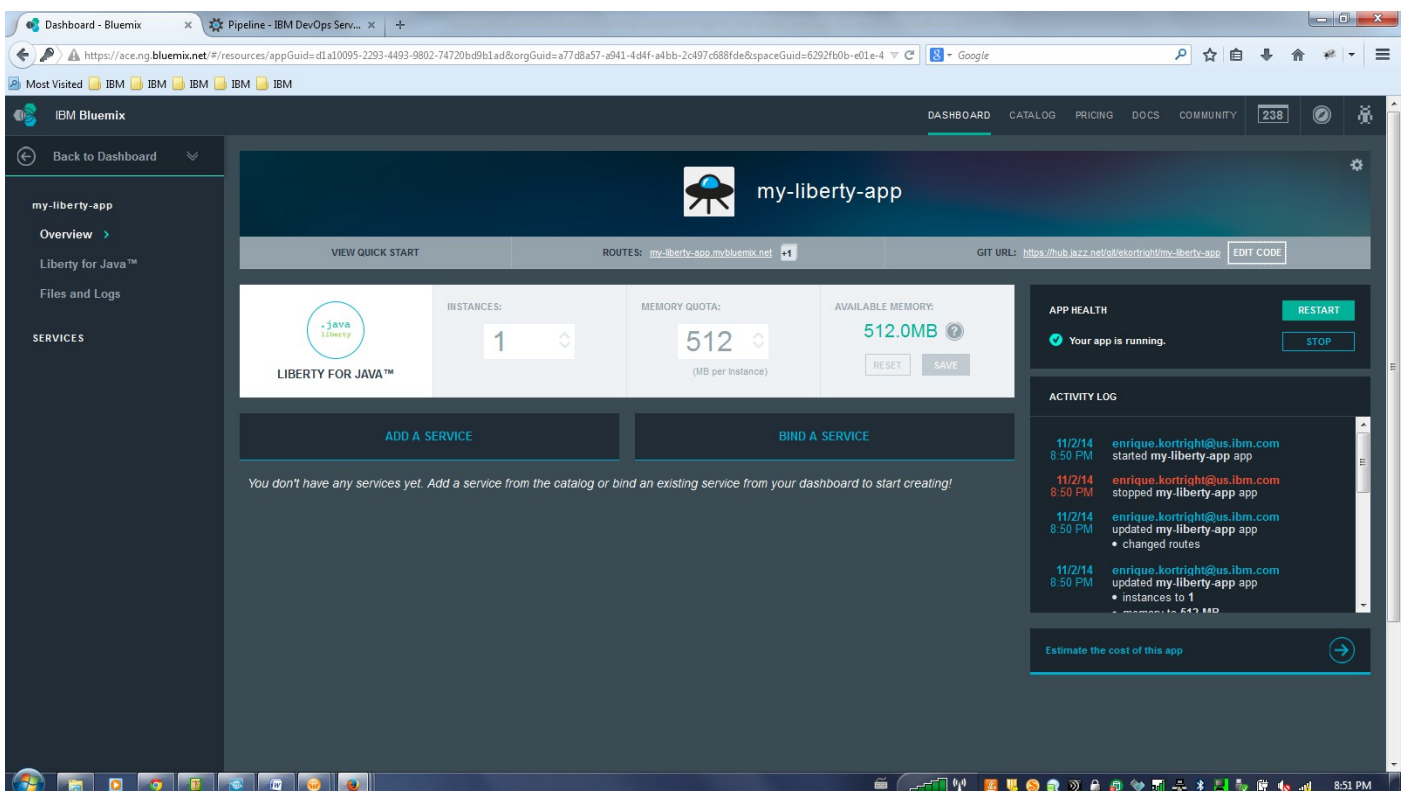

20. Once the deployment is completed, the app is stopped:

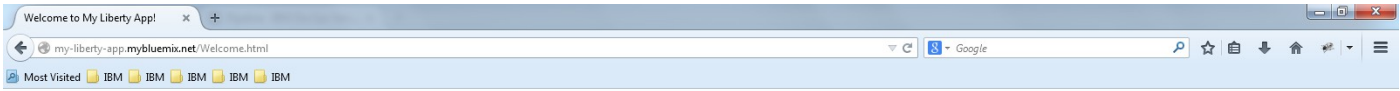

21. And then started in order to complete the deployment:

22. Go back to the Bluemix UI in your browser and you will notice in the ACTIVITY LOG that the application was just updated.

23. All done! Your web app now has a new Welcome page. The URL for the page is <http://my-liberty-app.mybluemix.net/Welcome.html>. Try it in a new browser window.

# Welcome to My Liberty App!

Welcome to my first WebSphere Liberty app! In future releases, we will be adding exciting functionality, including a calculator and a Hangman game. Stay tuned...
