Microsoft Imagine

# My First Project Spark Game

Add Special Effects to Characters
Card 5 of 7
I am learning: **Project Spark Game Programming**
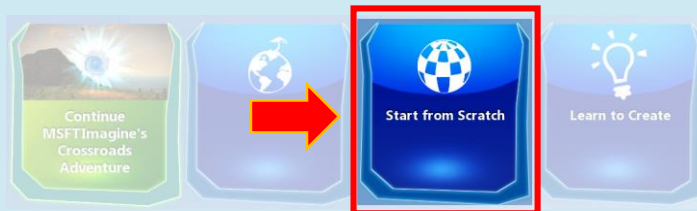

1. **Click on the Project Spark icon** in the Windows apps area to start Project Spark on a Windows PC.

2. **Click on Create** once you get to the main menu.

3. **Click on Start from Scratch** to start a blank game world.

4. **Follow the prompts onscreen** and click on the highlighted parts of the menus when asked.
5. **Click on and select Prop mode.**

6. **Click on the Prop mode arrow** and **select Edit**.

7. **Click on the character in the world,** and then **open his Brain.**
8. **Scroll down to the bottom of the lines of Kode already in the brain.**
9. **Click the + sign by the DO** section on the last blank line, and **open the Create folder**.
10. **Choose the Play FX tile.**

11. **Click the + sign by the DO** section on this same line, **open the Objects folder**, and **then select the Gallery Picker tile**.

12. **Pick any effect** you think looks cool.
13. **Click the + sign by the DO** section again on this line, **select the Modifiers folder**, and then **choose the On tile**.

14. **Click the + sign by the DO** section again on this line, **select the Objects folder**, and then **choose the Player tile**.
15. **Your last line of code will look similar to this – try different effects until you find a really cool one!**

Congratulations! Now you can add special effects to your player character!
